

Packaging With the Earth's Future in Mind.

Earth Smart® Sustainable Packaging

At D&W Fine Pack, we are committed to developing new and innovative packaging for our customers that is both functional as well as better for the environment.

This commitment is what inspired the launch of our new Earth Smart® line of products—designed to deliver a more sustainable beginning and end of life story without sacrificing quality or performance.

The grid below illustrates how each of our Earth Smart® products deliver on this commitment.

	Beginning of Life				End of Life	
	 PCR Content	 Bio-Based Content	 No Intentionally Added PFAS	 Reduced Environmental Impact	 Compostable	 Recyclable
 Bio-based Straws						
 Bio-based Rigid						
 Post Consumer PET						
 Mineral Filled PP						
 Molded Pulp						

Bio-based Straws and Rigid Containers

▶ Earth Smart® Straws and Rigid Containers are made using a bio-based material which is a combination of sustainably sourced wood pulp (57%) and acetic acid (A.K.A. vinegar) (43%).

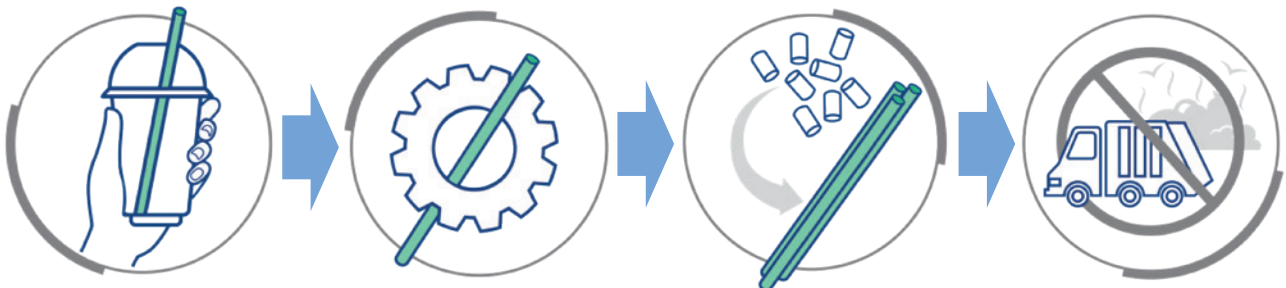

▶ This material is different from other bio-based materials such as PLA, PHA and PHB for one key reason: ours is the only one produced from recycled plastic that would have otherwise gone in a landfill.

▶ This material is also 100% certified biodegradable in soil and fresh water, as well as 100% marine biodegradable*.

*According to ASTM D6691 test methodology

- 100% biodegradable material in marine, freshwater and soil
- Decomposes leaving no microplastics behind
- Petrochemical free

How Earth Smart helps achieve sustainability goals

Each year, consumers use **500 million Earth Smart® straws***, which are smarter for business and better for our planet.

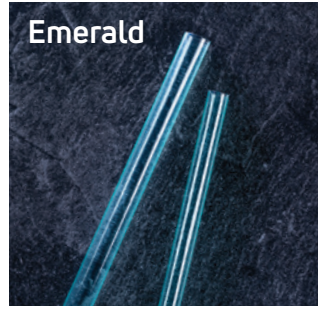

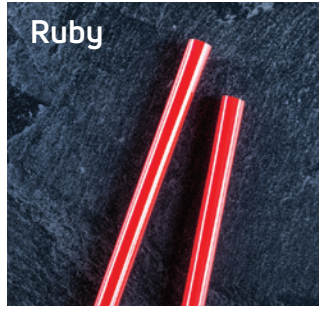

It takes just 1 pound of bioresin to produce **455 Earth Smart® straws.**

1.1 million pounds of bioresin yields **500 million Earth Smart® straws.**

500 million Earth Smart® straws keep **473 thousand pounds** of waste out of landfills!

*Numbers are for example only and are not exact.

- Certified industrial and home compostable
- Durable and crack resistant
- Perfect for cold and warm beverages up to 160 degrees F
- The only compostable straw with the same clarity as plastic
- Custom colors available* (*Contingent on meeting a required MOQ)

100% PCR manufactured PET with near virgin clarity

1: D&W's sophisticated contaminant removal system allows a broader range of post consumer PET to be utilized as input into their manufacturing process.

2: With all contaminants removed during extrusion, the result is a PET sheet free from all impurities and ready for thermoforming.

3: D&W's final output is crystal clear PET packaging that can be made with up to 100% PCR without sacrificing optics.

Higher Quality – Greater Clarity – More Sustainable

D&W's extrusion process utilizes a **state-of-the-art Extrusion System**, allowing us to take non-FDA grade recycled PET and turn it into high quality FDA approved food packaging.

What does this mean for our customers?

- Premium quality sheet with fewer imperfections than others in the market
- Clear PET packaging, with optics mimicking that of virgin PET
- Higher utilization of recycled PET that would have otherwise gone to the landfill
- Better security of supply vs. the competition since our contamination removal system allows for a broader range of input materials
