

Respect the Food!®

enviroware® **envirofoam**

Today's Choice for Strength, Reliability and Convenience

D&W Fine Pack's enviroware and envirofoam products offer customers the right choice when looking for performance in polystyrene packaging, with a complete line of foam products including containers, trays, plates and bowls in a variety of convenient sizes, along with cutlery and straws. The enviroware line adds a sustainability benefit, thanks to a material component that accelerates decomposition after use and a manufacturing method that eliminates the use of hydrocarbon blowing agents.

Respect the Food!®

envirofoam

- Heavy duty for strength and performance
- Hinged containers deliver insulation for heat retention in carryout foods
- envirofoam plates, bowls, containers and trays are manufactured using 100% recycled CO2 instead of a hydrocarbon blowing agent

enviroware®

- All of the features of envirofoam, plus enviroware is manufactured with an active organic catalyst (AOC) developed to accelerate the degradation rate
