

Forum[®]

Family of Packaging from
Side Salads to Catering

Features and Benefits

- 'Table Ready' containers enhance food presentation to help drive sales and enrich the take-out dining experience.
- Divided compartments insulate both hot and cold foods with our exclusive C-Fine® material.
- Anti-fog Power Seal® lids are leak resistant to help avoid messy spills during transport and provide crystal clear viewing for hot and cold food presentations.
- The Forum family of packaging from 7" to 18" has the same uniform look and high-quality features to fit all of your needs from single serving to catering.
- For more on your catering needs, see pages 6-8.
- Attractive Forum packaging offers an excellent merchandising appeal for any application.

“ **Most consumers** agree that subpar packaging can ruin a takeout experience. They say it's most important that foods and liquids do not leak, as this not only creates a mess, but also impacts food quality and freshness. It's also very important that packaging maintains the taste and temperature of the food. An investment in high-quality packaging is a must for operators to be successful in the takeout category.”

— Technomic, The Takeout & Off-Premise Dining Consumer Trend Report

Offering You More...

Forum® in Three Distinctive Options

C-Fine® – C-Fine® is D&W's proprietary (PS) material that is made from a patented process of air, water, and pressure to create a unique cellular structure without the use of CFC blowing agents. Most notably, the patented process reduces the use of oil-based resin by approximately 30% while delivering the same great performance attributes when compared to a similar product made from traditional Polystyrene. The product design offers insulating properties that maintain the right temperature for both hot and cold foods while keeping the container comfortable to hold. The process creates a thin wall, which is light weight and translates into low cube reducing transportation costs. Your customers get a package that is cut-resistant, while providing excellent oil and fatty food barriers.

Black Pearl® – High-Impact Polystyrene (HIPS) is extremely durable, especially for transporting. Black Pearl's rich, upscale look with its deep glossy black finish is a great way to create a stylish fast casual dining experience and enhance any catering meal presentation.

Lid Options - Every base and tray size has multiple matching lid choices to fit your needs.

Because your lid choices may vary...

Serve a complete meal in one package using a compartmented base and cover it with a matching compartmented lid to keep foods from spilling over and maintain flavors.

For larger food portions, we have high domes. For menu optimization and portion control, a low dome or flat lid will fit your needs.

Choose from a wide selection of Power Seal® leak-resistant stackable lids in vented and non-vented designs. All lid options utilize anti-fog feature to enhance food appearance and give a crystal clear presentation. Increase your brand recognition. Ask about our logo embossing capabilities.*

Multiple Lid Choices

from Flat to High Domes; vented, non-vented and compartmented options

Multiple Base Options

Shallow, Mid-depth, Deep; also varying depths in compartmented bases

*See your sales representative for more information on logo embossing and minimum order requirements
