VersaLock® Square and Rectangular

VersaLock® Square and rectangular containers utilize a tamper evident CORNER TAB feature to provide you and your customers a clear indication if products have been tampered with or damaged.

How to Use VersaLock® Tamper Evident Feature:

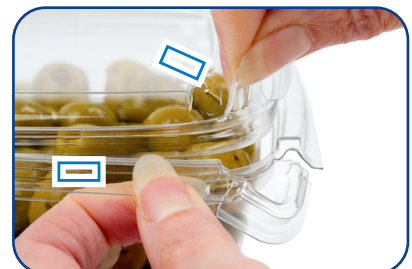

1 Sealed package corner lid tab indicates that package has not been tampered with

2 Pushing down on corner tab breaks seal

3 Broken seals and raised tab indicate that container has been tampered with

4 Lifting up on tab while pushing down on base side opens container

VersaLock® Square

Clear PET makes it easy to see what is inside

Lid design provides secure stacking

Corner tab with arrows indicating where to press down to open

Tight perimeter seals ensure leak-resistance

Flat panel area for labeling

*Feature available only on 8" square containers

Sidewall feature designed to prevent tampering*

*3-compartment lids only work with 3-compartment bases, whereas single compartment lids work with all bases.

HMR / Processor Trays

Available in either oxygen-barrier (with film) or non-barrier (no film) versions to meet your specific requirements

Our oxygen barrier version utilizes a multi-layer oxygen-barrier film laminated to the inner surface of the tray for high speed sealing

This version can also be utilized as part of a MAP (modified atmosphere packaging) process to extend shelf life for fresh meats or ready to eat meals

Film Coated

Not Film Coated

D&W Brand Hinged Containers - PS

D&W's proprietary patented process enables the manufacture of products that use 30% less oil-based polystyrene resin and incorporates 40% internally reprocessed material

Light weight for reduced carbon footprint while maintaining insulating properties

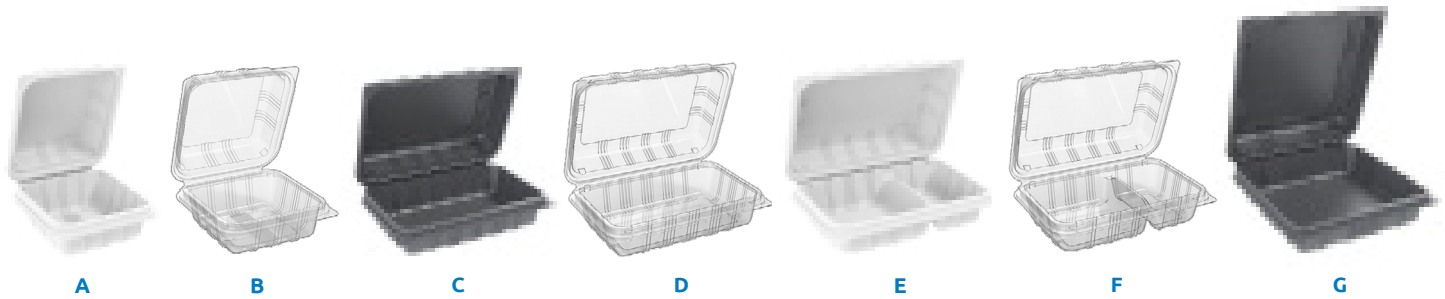

- Container stackability and rigidity help protect food in transit
- Vented lid options help safeguard food integrity
- Black, white and clear container options for merchandising flexibility

Earth Smart® Overview

At D&W Fine Pack, we are committed to developing new and innovative packaging for our customers that is both functional as well as better for the environment.

This commitment is what inspired the launch of our new Earth Smart® line of products – designed to deliver a more sustainable beginning and end of life story without sacrificing quality or performance.

The grid below illustrates how each of our Earth Smart® products deliver on this commitment.

	Beginning of Life				End of Life	
	 PCR Content	 Bio-Based Content	 No Intentionally Added PFAS	 Reduced Environmental Impact	 Compostable	 Recyclable
 Bio-based Straws						
 Bio-based Rigid						
 Post Consumer PET						
 Molded Pulp						
 Pressed Paperboard						

Bio-based Material Overview

- Certified compostable and biodegradable
- Decomposes leaving no microplastics behind
- Petrochemical free

▶ Earth Smart® straws and rigid containers are made using a bio-based material which is a combination of sustainably sourced wood pulp (57%) and acetic acid (A.K.A. vinegar) (43%).

▶ This material is different from other bio-based materials such as PLA, PHA and PHB for one key reason: it is **produced from recycled materials that would have otherwise gone in a landfill.**

▶ This material is also 100% certified biodegradable in soil and fresh water, as well as 100% marine biodegradable*.

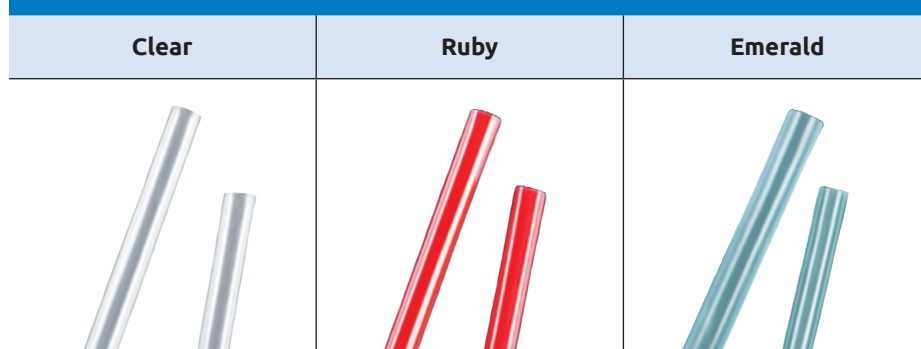

*According to ASTM D6691 test methodology

Earth Smart® Bio-based Straws

- ☐ Certified industrial and home compostable
- ☐ Durable and crack resistant
- ☐ Perfect for cold and warm beverages up to 160° F
- ☐ The only compostable straw with the same clarity as plastic
- ☐ Custom colors available*

Pressed Paper Containers

- 100% recyclable
- PFAS compliant
- Freezer safe
- Compostable and biodegradable*
- Grease and moisture resistant
- Microwave and oven safe
- Printable with colors and logos
- 50% post consumer PET lid
- Heat sealable**

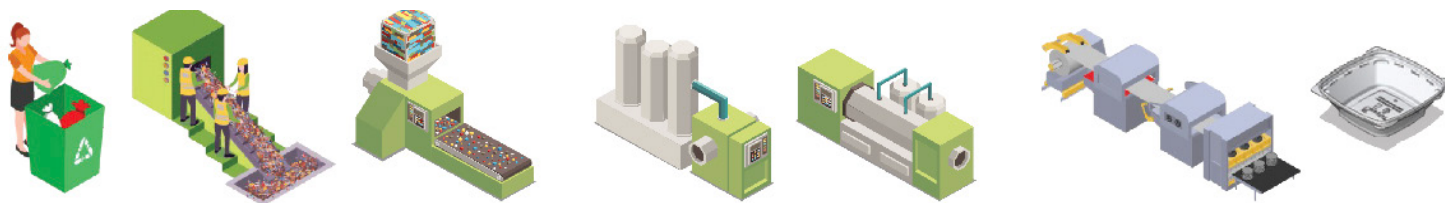

Item No.	Description	Material	Color Base/Lid	Dia.x Ht. (in.)	Case Wt. (lbs.)	Sleeve Pack	Case Pack	Cube (ft.3)	Ti x Hi
Tray & Lid

*Compostable under EN13432; biodegradable under EN14046

** Dependent on design. Stock item with rolled lid is not heat sealable.

Post-Consumer PET Overview

1: D&W's sophisticated contaminant removal system allows a broader range of post consumer PET to be utilized as input into their manufacturing process.

2: With all contaminants removed during extrusion, the result is a PET sheet free from all impurities and ready for thermoforming.

3: D&W's final output is crystal clear PET packaging that can be made with 50% PCR without sacrificing optics.

D&W's extrusion process utilizes a state-of-the-art Extrusion System, allowing us to take non-FDA grade recycled PET and turn it into high quality FDA approved food packaging.

What does this mean for our customers?

- ▣ Premium quality sheet with fewer imperfections than others in the market
- ▣ Clear PET packaging, with superior optics
- ▣ Higher utilization of recycled PET that would have otherwise gone to the landfill
- ▣ Better security of supply vs. the competition since our contamination removal system allows for a broader range of input materials

Crystal View® Bowls & Lid

- Stackable - elegant design offers stackability for ease of handling and merchandising
- Easy to seal - simple, intuitive perimeter-seal feature makes closing quick and easy
- Easy to open - generous lid tabs make opening containers fast and easy for consumers
- Made with 50% post consumer PET
